The financial statements are prepared on accrual basis under the historical cost convention, except for certain Fixed Assets which are carried at revalued amounts.

Current / Non-current classification

The Revised Schedule VI to the Act requires assets and liabilities to be classified as either Current or Non-current.

An asset is classified as current when it satisfies any of the following criteria:

- (b) it is held primarily for the purpose of being traded;
- (c) it is expected to be realized within twelve months after the balance sheet date; or

ii. USE OF ESTIMATES

Difference between the actual

results and estimates are recognised in the period in which the results are known/materialised. The management believes that the estimates used in the preparation of the financial statements are prudent and reasonable.

iii. TANGIBLE ASSETS

Fixed Assets are stated at cost of acquisition / construction or book value and includes amounts added on revaluation less accumulated depreciation and impairment loss, if any. The cost of Tangible Assets comprises its purchase price, borrowing cost and any cost directly attributable to bringing the asset to its working condition for its intended use.

Subsequent expenditures related to an item of Tangible Asset are added to its book value only if they increase the future benefits from the existing asset beyond its previously assessed standard of performance.

Projects under which assets are not ready for their intended use are disclosed under Capital Work-in-Progress.

iv. INTANGIBLE ASSETS

Intangible Assets are generally stated at cost of acquisition net of recoverable taxes less accumulated amortisation/ depletion.

v. INVESTMENTS

Current Investments are carried at lower of cost and fair value. Long term investments are carried at cost. However, when there is a decline, other than temporary, the carrying amount is reduced to recognise the decline.

vi. DEPRECIATION

Effective 1st April 2014, the Company depreciates its Fixed Assets over the useful life in the manner prescribed in Schedule II to the Companies Act, 2013, as against the earlier practice of depreciating at the rates prescribed in Schedule XIV to the Companies Act, 1956.

- (i) In case of pre-owned assets, the useful life is estimated on a case to case basis.
- (ii) Depreciation on additions to the assets or on sale/discardment of assets, is calculated pro rata from the month of such addition or upto the month of such sale/discardment,
- (iii) Based upon the future projections, the Company has estimated the economic useful life of the assets and accordingly the assets have been depreciated.

vii. INVENTORIES

The inventory is valued as follows:

- | | |
|-----------------------------|--|

| (ii) Stores and Spare parts | At Cost First in First out. |
| (iii) Finished Goods | Valued at lower of cost or Net Relisable Value |
| (iv) Work in Process | At cost by using absorption cost method. |

As per normal practices the cost of finished goods includes all direct cost and normal fixed overheads. However, it does not include selling and distribution cost. Value of stock of finished goods at the date of Balance Sheet includes duties and taxes if any applicable.

viii. RETIREMENT BENEFITS

Any premium or discount arising at the inception of the forward exchange contract is recognized as income or expense over the life of the contract.

xi. REVENUE RECOGNITION

Revenue is recognised only when risks and rewards incidental to ownership are transferred to the customer, it can be reliably measured and it is reasonable to expect ultimate collection. Revenue from operations includes sale of goods, excise duty and adjusted for discounts (net).

Interest income is recognised on a time proportion basis taking into account the amount outstanding and the interest rate applicable.

xii. PROVISION, CONTINGENT LIABILITIES AND CONTINGENT ASSETS :

Provision is recognised in the accounts when there is a present obligation as a result of past event(s) and it is probable that an outflow of resources will be required to settle the obligation and a reliable estimate can be made. Provisions are not discounted to their present value and are determined based on the best estimate required to settle the obligation at the reporting date. These estimates are reviewed at each reporting date and adjusted to reflect the current best estimates.

Contingent liabilities are disclosed unless the possibility of outflow of resources is remote.

Contingent assets are neither recognised nor disclosed in the financial statements.

xiii. BORROWING COSTS

Borrowing costs that are attributable to the acquisition, construction or production of qualifying assets are capitalised as part of the cost of such assets. A qualifying asset is one that necessarily takes a substantial period of time to get ready for its intended use or sale. All other borrowing costs are charged to revenue.

xiv. TAXES ON INCOME

Tax expense comprises of current tax and deferred tax. Current tax is measured at the amount expected to be paid to the tax authorities, using the applicable tax rates. Deferred income tax reflect the current period timing differences between taxable income and accounting income and reversal of timing differences of earlier years/period. Deferred tax assets are recognised only to the extent that there is a reasonable certainty that sufficient future income will be available except that deferred tax assets, in case there are unabsorbed depreciation or losses, are recognised if there is virtual certainty that sufficient future taxable income will be available to realise the same.

Deferred tax assets and liabilities are measured using the tax rates and tax law that have been enacted or substantively enacted by the Balance Sheet date.

xv. DOUBTFUL DEBTS/ADVANCES

Provision is made in the accounts in respect of debts/advances which in the opinion of the management are considered doubtful of recovery.

xvi. IMPAIRMENT LOSS

Impairment loss is provided to the extent the carrying amount of assets exceeds their recoverable amounts. Recoverable amount is the higher of an asset's net selling price and its value in use. Value in use is the present value of estimated future cash flows expected to arise from the continuing use of the asset and from its disposal at the end of its useful life. Net selling price is the amount obtainable from sale of the asset in an arm's length transaction between knowledgeable, willing parties, less the costs of disposal.
